

# **What do you as a Chemical Society expect from IUPAC**

**Chunli Bai  
Chinese Chemical Society**

# Chinese Chemical Society

- ◆ Chinese Chemical Society was founded in 1932
- ◆ There are 31 branches and more than 50,000 members
- ◆ Chinese chemists knew IUPAC very well
  - ✦ IUPAC is a largest and highest level international organization in Chemistry
  - ✦ IUPAC arranged many conferences and other activities in China
- ◆ IUPAC should do more for publicizing the Chemistry in developing countries and underdeveloped regions
  - ✦ Have more developing countries join IUPAC
  - ✦ Arrange more conferences, seminar or training courses in developing countries

# Chinese Chemical Society

- ◆ **China is comparatively strong in Chemical Industry based on the National Subscription among the developing countries**
- ◆ **There is a serious environmental problem during the industrialization in China**
- ◆ **Chemistry is facing a big challenge in China**
  - ★ **CCS should do more to publicizing the Chemistry especially in the western region of China under the help of IUPAC**
  - ★ **CCS should do more to encourage chemical industry to apply new technologies for pollution control**
  - ★ **CCS should have not only academic but also industrial sector attend international conferences sponsored by IUPAC**
