The IUPAC-UNESCO-UNIDO Safety Training Program allows safety training experts from developing countries to learn about safety and environmental protection by visiting plants of IUPAC Company Associates in the industrialized world. The Program is part of an initiative by the IUPAC Committee on Chemistry and Industry that includes sponsorship of Workshops on Safety in Chemical Production.

Safety Training Program Fellows are scientists and engineers at a supervisory or managerial level in chemical companies, government institutions or scientific institutions; engaged in aspects of safety and environmental protection in chemical, pharmaceutical, or biotechnological production or in the teaching of these fields; and have the ability to influence safety practices in their places of employment and elsewhere within their home country. Since 2000, nine Fellows from China, Egypt, Kenya, Nigeria, Turkey, and Uruguay have received training. Our recent trainees have an impressive record of success in effecting positive change in health, safety and environmental quality, and the Safety Training Program looks forward to continuing to contribute to capacity building in the developing world.
